

3rd Special Colloquium of the CRC 1349

October 24, 2019

Lecture Hall of Inorganic Chemistry, Institute of Chemistry and Biochemistry
Freie Universität Berlin
Fabeckstraße 34/36, 14195 Berlin

14:30—15:30 *Synthesis and Applications of Fluorinated Electron Acceptors*

Prof. Dr. Olga Boltalina

(Colorado State University, USA)

15:30—16:00 Coffee break

16:00—17:00 *Liebig-Lectureship*

*Methods for the synthesis of organofluorine compounds:
from difluorocarbene to photocatalysis*

Prof. Dr. Alexander Dilman

(N. D. Zelinsky Institute of Organic Chemistry, Russia)

17:15—18:00 *The Reactivity Landscape of Non-Heme Iron and Nitric Oxide: Fundamental Chemistry and Biological Relevance*

Prof. Dr. Nicolai Lehnert

(University of Michigan, USA)

18:30 Get-together

Freie Universität

Berlin
